

# VAMSI PONNADA

☎ +1 913-217-8675   ✉ Ponnadavamsi75@gmail.com   🔗 LinkedIn   📍 San Francisco, CA

## Professional Summary

---

- Cybersecurity professional with over 5+ years of experience specializing in threat detection, incident response, and continuous security monitoring across diverse global enterprise environments.
- Proficient in administering Splunk Enterprise Security and developing complex SPL queries to optimize log ingestion, data normalization, and critical enterprise correlation searches efficiently.
- Adept at conducting proactive threat hunting utilizing EDR, CASB, and Darktrace to identify anomalous behaviors bypassing traditional network defenses and mitigating advanced threats.
- Skilled in triaging complex security alerts from diverse cloud platforms including AWS and Azure, continuously improving alert fidelity and reducing operational false positives.
- Dedicated to authoring comprehensive incident response playbooks and meticulously maintaining standardized documentation to drastically strengthen overall organizational security postures and regulatory compliance.

## Technical Skills

---

**SIEM & Endpoint Security:** Splunk Enterprise Security (ES), SPL Queries, CrowdStrike Falcon, Darktrace, EDR, Microsoft Sentinel, IBM QRadar, Log Analysis

**Security Operations:** Incident Response, Threat Detection, Security Monitoring, Threat Hunting, Alert Triage, Detection Engineering, Root Cause Analysis

**Network & Cloud Security:** AWS, Azure, CASB, Netskope, Firewalls, IDS/IPS, Cloud Infrastructure Logs, TCP/IP, VPN, Wireshark

**Identity & Vulnerability Management:** Active Directory, Entra ID, IAM, SSO, MFA, RBAC, Vulnerability Assessment, Risk Management

**Scripting, Frameworks & Tools:** Python, Bash, PowerShell, Windows/Linux Server Logs, MITRE ATT&CK, Incident Playbooks, ServiceNow

## Experience

---

### Qualcomm

July 2026 – Present

*Software Engineer*

- Investigated complex security event logs from diverse network platforms, effectively reducing critical incident response times by thirty-five percent utilizing Splunk Enterprise Security workflows.
- Monitored high-volume telemetry from firewalls, servers, and Darktrace appliances to triage sophisticated alerts and accurately identify potential network threats bypassing traditional perimeter controls.
- Developed advanced SPL queries and correlation searches to normalize vast enterprise log sources, successfully increasing accurate threat detection coverage by twenty-seven percent overall.
- Conducted proactive threat hunting initiatives across complex AWS and Azure cloud environments, uncovering anomalous behaviors and coordinating targeted containment strategies with cross-functional teams.
- Optimized custom detection rules and operational SIEM dashboards, seamlessly reducing daily false positive alerts by approximately forty percent while ensuring strict operational efficiency.
- Documented meticulous incident response playbooks and streamlined alert triage procedures to continuously support standardized cybersecurity workflows and improve enterprise threat analysis operational standards.

### Capital One

Aug 2025 – July 2026

*Cybersecurity Engineer*

- Performed in-depth initial analysis of endpoint security events utilizing CrowdStrike EDR, consistently achieving a ninety-five percent success rate in identifying precise attack root causes.
- Supported complex log onboarding processes by seamlessly integrating critical Windows and Linux server telemetry directly into the enterprise Splunk environment for continuous monitoring.
- Validated comprehensive log source completeness and alert relevance across critical infrastructure, successfully decreasing critical blind spots by roughly thirty percent during quarterly assessments.
- Prioritized targeted vulnerability remediation efforts based strictly on assessed business impacts and operational risks to drastically reduce overall attack surfaces across hybrid infrastructure.
- Executed precise correlation searches using advanced SPL logic to identify sophisticated lateral movement attempts, blocking over fifty potential malicious intrusions during peak hours.
- Collaborated continuously with global security teams to investigate critical cybersecurity incidents and formally recommend robust remediation actions tailored to complex multi-platform enterprise networks.

## **Tata Consultancy Services**

**Jan 2020 – Dec 2023**

### *IAM Analyst*

- Managed enterprise user identities and access provisioning workflows, successfully executing over five thousand precise access requests while maintaining rigorous organizational security compliance standards.
- Analyzed identity-related security alerts and unauthorized access attempts directly within the SIEM environment to ensure rapid escalation and thorough containment of compromised accounts.
- Automated repetitive access lifecycle tasks and complex IAM reporting processes using advanced scripting, drastically reducing manual administrative workloads by forty-five percent per quarter.
- Assisted in defining comprehensive detection use cases targeting abnormal authentication patterns, continuously improving the overall fidelity of identity-driven security alerts across diverse systems.
- Supported periodic user access reviews and detailed compliance audits, accurately validating critical entitlements and maintaining a flawless ninety-nine percent pass rate during assessments.
- Maintained meticulous IAM documentation and standardized access control procedures to continuously support essential regulatory frameworks and strengthen the foundational enterprise cybersecurity operational posture.

## **Certifications**

---

- CompTIA Security+
- Microsoft Certified: Identity and Access Administrator Associate

## **Education**

---

**University of Central Missouri**

**Jan 2024 – May 2025**

*Master in Computer Science*
